

2/6/26 | Vaca Dixon Power Center

Vaca Dixon Power Center files an application with the California Energy Commission to construct a 157MW lithium-ion battery energy project at Kilkenny Rd and Hwy 80. This land is zoned business park and was intended to be part of the City of Vacaville's Northeast Growth Corridor attracting high paying jobs to the area. The site also sits near residential areas, a hospital and active agricultural areas and water canals. To make a comment please visit this link: <https://efiling.energy.ca.gov/Ecomment/Ecomment.aspx?docketnumber=26-OPT-01>

Vacaville Planning Commission approves the new battery energy storage (BESS) ordinance, which would ban utility scale lithium-ion BESS

11/6/25 | The Corby Project Hearing

The Corby Project public hearing was well attended and many spoke out in public comment opposing the project. We are awaiting an Environmental Impact Report from the California Energy Commission sometime around March 2026. To watch a replay of the meeting visit this link <https://www.energy.ca.gov/event/meeting/2025-11/informational-and-environmental-scoping-meeting-proposed-corby-battery-energy>

10/18/23 | Please help us with email campaigns!

We are starting an email campaign starting today and we need your help!

Please send an email to the city manager using the template below and copy the city council using the emails provided.

We want to send a clear message to end this negotiating agreement.

1) Copy and paste the city manager's email into the "TO" box:
Aaron.busch@cityofvacaville.com

2) Copy and paste the city council's email into the "CC" box:

john.carli@cityofvacaville.com,jeanette.wylie@cityofvacaville.com,greg.ritchie@cityofvacaville.com,roy.stockton@cityofvacaville.com,michael.silva@cityofvacaville.com,jason.roberts@cityofvacaville.com,sarah.chapman@cityofvacaville.com

3) Copy and paste this message into the body of the email, don't forget to sign your name:

City Manager Aaron Busch,

I'm writing to urge you to deny any extensions for the ENRA between the City of Vacaville and Menard Energy LLC that is set to expire January 10, 2024. Additionally do not sell 7050 Leisure Town Rd, to Menard Energy, LLC.

It's clear Menard Energy isn't the right fit for Vacaville. There are numerous safety and environmental concerns with the location and the battery type proposed in their project. Additionally, Menard Energy LLC has no experience building a battery energy storage system in the United States. The Vacaville community is largely opposed to this project as shown by petition signatures and the overwhelming turnout at the community meeting on September 7th, 2023. We need to ensure the safety of our firefighters and police officers along with the citizens of Vacaville.

Please listen to the citizens of Vacaville and give no extensions to the ENRA. Letting the negotiating agreement expire on January 10, 2024 will allow the City to look at better alternatives for the property at 7050 Leisure Town Rd.
